

SUMMARY

Curious and passionate about technology, adventure, and hands-on learning. Developed attention to detail, professional integrity, and a collaborative mindset. Able to thrive in dynamic environments, committed to seeking challenges, and always eager to grow.

SKILLS

- C++
- JavaScript
- Mongo.DB
- Git
- Revit
- SketchUp
- Java
- Html
- Node.js
- GitHub
- AutoCAD
- Lumion
- TypeScript
- CSS
- React
- Python

EXPERIENCE

Landscape Architect & Technical Designer | 2022 – 2024 | Linkovsky Landscape Architecture & Studio Zura

- Project Management & Execution:** Managed the end-to-end development life cycle of design projects, overseeing on-site execution and ensuring alignment with technical specifications.
- Cross-Functional Collaboration:** Partnered closely with multidisciplinary teams—including engineers, contractors, and consultants—to validate feasibility, troubleshoot implementation issues, and deliver high-quality results.
- Technical Modeling & Data Management:** Served as a Revit/BIM Specialist, developing and managing complex, data-rich 3D models to bridge the gap between conceptual plans and physical execution.
- System & Spatial Analysis:** Conducted comprehensive site analyses to optimize spatial utility and resource allocation within strict project constraints.

EDUCATION

- College of Management Academic Studies**
2024 - current
B.Sc. in Computer Science
- Shenkar College of Engineering, Design and Art**
2020-2022
Practical engineer in Landscape architecture
AVG : 90

AWARDS & CERTIFICATIONS

- P.E landscape architecture with academic excellence
- Recognized for exemplary behavior - IDF Physical Training Instructor Course.
- Outstanding Soldier Award for excellence in role performance

PROJECTS

- IoT Temperature Monitoring System** | TypeScript, Python, React , Raspberry Pi, MQTT, AWS
Engineered a real-time IoT monitoring system for industrial refrigeration using DS18B20 sensors and Raspberry Pi microcontrollers.
Architected a continuous data streaming pipeline via MQTT, storing time-series telemetry in AWS.
- Private Cloud Drive** | Cloudflare Tunnel, TypeScript, React, Node.js, MongoDB
Developed a self-hosted, full-stack cloud storage application prioritizing data sovereignty and secure file management.
Built a responsive React/TypeScript front-end integrated with a node.js backend.
- Smart Irrigation Web App** | JavaScript, MongoDB, HTML, CSS
Built a responsive web application to calculate, schedule, control, and automate large irrigation systems.
